Hazardous Materials

Management Program (HMMP)

Ms. Sherri Robinson Sullivan International Group, Inc.

History of the FJ HMMP

- Army Regulations, Federal, State, and local laws have increased the requirements for managing hazardous materials at Army installations. These laws require installations to provide data on the types and quantities of HM stored, used, procured and disposed of.
- This program, known as the Hazardous Materials Management Program directs Army installations to track hazardous materials and hazardous waste from "cradle to grave".
- Each month, organizations report hazardous material usage and procurement to the Hazardous Substance Management System (HSMS) Support Office.
- HSMS Support Office enters usage and procurement into the HSMS database.

Why Track Hazardous Materials?

The Secretary of Defense requires all DoD agencies to improve environmental performance by implementing policies to prevent pollution in all phases of the acquisition process, in the procurement of goods and services, and in life cycle management.

HIMIMP Responsibilities

HM Manager (HMM)

Tracks Hazardous Materials
Prepares HMTF

Environmental Compliance Officer **(ECO)**

Collects HMTFs from HM Managers Submits reports to HSMS Support Office

HSMS Support Office
Project Manager/Database Administrator
Enters HMTF info into HSMS DataBase
Prepares Reports

HM Manager

- Designated by Supervisor or ECO
- Manages HM Inventory for their area
- Periodically inventories the empty containers
- Maintains the HMTF
 - HM purchased or received
 - HM used
 - HM transferred notes any surplus or excess material

ECO's Responsibility for HMMP

- Collect hazardous material tracking form(s) [HMTF] from HM Managers
- Submit report to HSMS Support Office by 10th of each month

What Materials are Considered Hazardous?

- Starting Fluid
- Decontamination Kits
- Photographic Supplies
- Dyes
- Gases, Compressed and Liquefied
- Pest Control Agents and Disinfectants
- Cleaning and Polishing Compounds
- Paints, Varnishes, and Related Products
- Preservatives and Sealing Compounds
- Adhesives
- Compressed Gas Cylinders
- Liquid Propellants and Fuels
- Oils and Greases, Cutting, Lubricating, and Hydraulic
